7. Other relevant information

- (1) **For Iron/Steel and Alloy Steel goods, Mill certificates MUST be made available to Cotecna prior to inspection** as required for verification under the programme as per list in (4) below. All mill certificates must show the name of the manufacturer, certificate no. and date of issuance, country of origin, description of goods, specifications, test results detailing chemical composition, mechanical properties, manufacturer signature, etc. Inspections can only be carried out when preliminary verification of quantities, product specifications against Mill/Test certificates are in accordance with VO data.
- (2) For **Alloy Steel**, Exporters may be requested to provide samples for testing purposes. Testing may be done in the laboratory located in the mill and witnessed by Cotecna, or tested in an accredited independent laboratory. Exporters can only ship the goods upon receipt of satisfactory test results. The samples retrieval and testing will be done selectively based on the following criteria:

No.	Information of other alloy elements on Mill Certificate	Sample/ Testing
1	Boron is the only element, with content $\geq 0.0008\%$	Yes
2	Other alloy elements with content at least equal to minimum required as defined in BTKI2012 and Boron element with content $\geq 0.0008\%$.	No
3	Other alloy elements with content at least equal to minimum required as defined in BTKI2012.	No

For nos. 2 & 3, sample retrieval & testing will be carried out at random & exporter will be informed in advance.
